DETAILED ACTION

This office action is in response to the preliminary amendment filed 1/28/02.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the “*fuel tank, means to provide a hydrocarbon fuel, connection means, hydrogen peroxide tank, decomposition chamber*” must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Applicant filed a preliminary amendment on 1/28/02. In this amendment, applicant requested that the originally filed claims 9 and 12 be amended. However, in the disclosure originally filed there was never a claim 12. Therefore, the misnumbered claim (or new claim) 12 has not been entered and so it will not be considered as part of this rejection. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

3. Claim 7 recites, “a turbofan located with a duct” in line 3. This sentence should be replaced by “a turbofan located *within* a duct”. Appropriate correction is required.

4. Claim 3 is objected to because it erroneously depends from claim 4.

Art Unit: 3746

5. Claim 1 recites, “a micro air vehicle comprising fuel tank” in line 1. This sentence should be replaced by “a micro air vehicle comprising *a* fuel tank”. Appropriate correction is required.

6. Claim 3 recites, “an engine as claimed in claim 4 additionally comprising a means for providing” in lines 1-2. This sentence should be replaced by “an engine as claimed in claim 2 *further* comprising means for providing”. Appropriate correction is required.

7. Claim 4 recites, “a method of propelling a micro air vehicle comprising decomposing hydrogen” in line 1. This sentence should be replaced by “a method of propelling a micro air vehicle comprising *the steps of* decomposing hydrogen”. Appropriate correction is required.

8. Claim 7 recites, “a method of propulsion comprising decomposing hydrogen peroxide” in line 1. This sentence should be replaced by “a method of propulsion comprising *the steps of* decomposing hydrogen peroxide”. Appropriate correction is required.

9. Claim 8 recites, “a method as claimed in claim 7 wherein additionally comprising burning a...” in line 1. This sentence should be replaced by “a method as claimed in claim 7 *further* comprising *the step of* burning a...”. Appropriate correction is required.

10. Claim 5 recites the limitation "said combustion" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Specification

11. The spacing of the lines of the specification is such as to make reading and entry of amendments difficult. New application papers with lines double spaced on good quality paper are required.

Art Unit: 3746

12. This application **does not contain an abstract** of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

13. The following titles are missing from the disclosure: Title of the Invention, Background of the Invention, Field of the Invention, Description of the Related Art including information disclosed under 37 CFR 1.97 and 37 CFR 1.98, Brief Summary of the Invention, Brief Description of the Several Views of the Drawing(s) and Detailed Description of the Invention:

Claim Rejections - 35 USC § 102

14. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

15. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by **Kosaka et al.** (U.S. 4,059,415).

16. With respect to claims 1-3, **Kosaka** teaches an apparatus that comprises a fuel tank 52, a hydrogen peroxide tank 32, a decomposition chamber 10 and a nozzle. See particularly **Figure 2**, column 4 lines 1-5 and abstract.

17. With respect to claims 4-9, the operation of the prior art apparatus of **Kosaka** will inherently perform the claimed method.
